PROFESSIONAL SUMMARY

Software Engineering graduate (Honours, UTM) and full-stack developer with six months of industry experience shipping full-stack and AI-powered applications. Built and launched Monaliza, a live Arabic-first e-commerce platform for the Saudi market, using Next.js, React, TypeScript, PostgreSQL, and Prisma. Strong in API design, secure authentication, real-time services, LLM and RAG integration, Docker, and CI/CD. Bilingual in Arabic and English.

TECHNICAL SKILLS

Core: TypeScript, JavaScript, Python, Java, SQL
Frontend: Next.js, React, Vue.js, Tailwind CSS, HTML5, CSS3, responsive design
Backend: Node.js, NestJS, Express.js, FastAPI, Spring Boot, REST APIs, WebSockets
Data & Auth: PostgreSQL, MySQL, MariaDB, MongoDB, Prisma, NextAuth.js, OAuth
DevOps & Testing: Docker, Jenkins, CI/CD, GitHub, Maven, JUnit, Apache JMeter, Postman, Jira
AI & LLM: OpenAI API, OpenAI Realtime API, Whisper ASR, RAG, semantic search, Dify

EXPERIENCE

Software Engineering Intern

Asrix Prime Berhad | *Subang Jaya, Malaysia* | *Sep 2025 - Feb 2026*

- Built a real-time voice streaming service with Python, FastAPI, and WebSockets, integrating Whisper ASR and the OpenAI Realtime API for voice-to-text-to-speech interaction.
- Designed a RAG-based legal analysis system for Malaysian Federal Legislation, enabling semantic search and automated risk assessment across large legal document sets.
- Developed a Dify Chatflow Invoker plugin integrating seven platforms, including LinkedIn, Meta, and Telegram, to automate cross-platform messaging and content workflows.

SELECTED PROJECTS

Monaliza - Arabic E-Commerce Platform for Saudi Arabia

Jul 2026 - Present | *Next.js 16, React 19, TypeScript, PostgreSQL, Prisma, Tailwind CSS*

- Built an Arabic-first commerce platform covering product variants, cart, checkout, customer accounts, seller administration, order fulfilment, shipment tracking, and verified-purchase reviews.
- Designed 14 relational Prisma models with variant-level inventory, checkout-time price snapshots, role-based access control, and ownership-protected orders.
- Implemented credentials and Google OAuth authentication with protected server actions, account-status enforcement, and separate seller authorization workflows.
- Created a secure bank-transfer workflow with authenticated receipt uploads, seller verification, serializable transactions, idempotent confirmation, and atomic inventory updates.

Live Website | **Private Repository**

Automated CI/CD Pipeline - Student Records API

Jun 2026 - Jul 2026 | *Jenkins, Docker, GitHub, JMeter, Maven, Spring Boot, Java 21*

- Built a five-stage Jenkins pipeline to clone, build, test, performance-test, and deploy a Spring Boot REST API on every GitHub push with fail-fast release gating.
- Containerised the application and automated Docker Hub publishing, enabling repeatable pull-and-run deployment for the team.
- Integrated JMeter load testing (10 concurrent users) and automated Jira build-status comments via the Jira API.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honours

Universiti Teknologi Malaysia (UTM), Johor Bahru | *Oct 2026* | *CGPA: 3.31 / 4.00*

Bachelor of Arts in English Language

Jazan University, Saudi Arabia | *Jan 2020* | *CGPA: 4.26 / 5.00*

CERTIFICATIONS & ACHIEVEMENTS

Dean's List: Universiti Teknologi Malaysia | Semester II 2024/2025 (GPA 3.77) and Semester II 2023/2024 (GPA 3.73)
UTM AI Ideathon - Participant: Faculty of Computing, UTM and MDEC | Jun 2025
Succeed in the Age of AI: Udemy | Jan 2026 | 8.5 hours
Talent and Competency Management Course: UTM Career Centre
